

Aman

Computer Science & Engineering Student | Full Stack Developer & AI Enthusiast

PROFILE

Computer Science and Engineering student focused on web development, full-stack development, AI, and problem solving. Enjoys learning by building practical projects and improving skills through consistent practice.

EDUCATION

Lovely Professional University B.Tech - Computer Science and Engineering CGPA: 9.47	Aug 2025 - Present Phagwara, Punjab
St. Joseph's Convent School Higher Secondary Education Percentage: 89.25%	Apr 2024 - Mar 2025 Kotdwar, Uttarakhand
St. Joseph's Convent School Secondary Education Percentage: 93.2%	Apr 2022 - Mar 2023 Kotdwar, Uttarakhand

SKILLS

Programming: C++, JavaScript **Frontend:** HTML, CSS, React **Backend:** Node.js, Express, REST APIs **Tools:** Git, GitHub, VS Code

PROJECTS

Hand Gesture Home Automation - Built a system for controlling lights and fans using hand gestures with computer vision. Technologies: Python, OpenCV, Computer Vision, IoT.

Full Stack Web Project - Responsive web application focused on clean UI, reusable components, and practical backend integration using React, Node.js, and Express.

CERTIFICATES

- Introduction to Web Development with ChatGPT - Simplilearn (Aug 2026)
- Introduction to Generative AI - Simplilearn (Aug 2026)
- Learning Full Stack React - Infosys Springboard (Mar 2026)

ACHIEVEMENTS

- Solved more than **50+** programming problems on online coding platforms during regular practice and learning.
- Achieved the **LeetCode 100 Days Badge** by maintaining consistent daily problem solving.

Portfolio: A dark, interactive developer portfolio with project showcase, certificate timeline, and a portfolio-specific AI assistant. Contact details can be added in the portfolio Contact section.
